SUPPLEMENTARY INFORMATION:

I. Background

In accordance with section 51.118 of title 10 of the *Code of Federal Regulations* (10 CFR), the NRC is making available final Supplement 5, Second Renewal to NUREG-1437, regarding the renewal of Florida Power and Light Company's operating licenses DPR-31 and DPR-41 for an additional 20 years of operation for Turkey Point Nuclear Generating Unit Nos. 3 and 4. A Notice of Availability of Draft Supplement 5, Second Renewal to NUREG-1437 was published in the *Federal Register* on April 5, 2019 (84 FR 13662), by the Environmental Protection Agency. The public comment period on draft Supplement 5, Second Renewal to NUREG-1437 ended on May 20, 2019, and the comments received are addressed in final Supplement 5, Second Renewal to NUREG-1437.

II. Discussion

As discussed in Chapter 5 of final Supplement 5, Second Renewal to NUREG-1437, the NRC staff determined that the adverse environmental impacts of subsequent license renewal for Turkey Point are not so great that preserving the option of subsequent license renewal for energy-planning decisionmakers would be unreasonable. This recommendation is based on: (1) the analysis and findings in the GEIS; (2) information provided in the environmental report and other documents submitted by Florida Power and Light; (3) consultation with Federal, State, local, and Tribal agencies; (4) the NRC staff's independent environmental review; and (5) consideration of public comments received during the scoping process and on the Draft Supplemental Environmental Impact Statement.

Dated at Rockville, Maryland, this 25th day of October, 2019.
